Management of CW COVID-19 positive staff (including Medical) and contact tracing

April 9, 2020

What's New?	This algorithm has been developed to establish an end to end process for managing a COVID-19 positive staff (including medical) and the subsequent staff and patient contact tracing processes.
Why?	<ul style="list-style-type: none"> • It will support visualization of each step and understanding of the role of the multiple stakeholders involved in implementing those processes. • It will ensure alignment and clarity of roles and responsibilities between multiple stakeholders
How does this affect my practice?	<ul style="list-style-type: none"> • This document should be referred to for clarification of the process when a staff (including medical) tests positive for COVID-19. • It will provide support for decision making for those who manage staff who test positive for COVID-19
How do I find out more?	<ul style="list-style-type: none"> • See ePOPS for the following: Management of CW COVID positive staff (including Medical) and contact tracing
Who do I contact for further information?	Cheryl Davies, Chief Operating officer (COO), BC Women's Hospital + Health Centre
