# Donning and Doffing PPE Peer Observation Tool

## December 7, 2020

<b>What's New?</b>	A <a href="#">Donning and Doffing PPE: Peer Observation Tool</a> has been created for use by staff in any area to support proper donning and doffing practice. This tool may be used to provide just in time teaching and coaching from one staff member to another.
<b>Why?</b>	The Peer Observation Tool supports peer to peer support of proper donning and doffing steps for PPE. Peer observation and support for PPE donning and doffing is encouraged to promote staff safety. Proper donning and doffing are essential to prevent the spread of infection, including reducing the risk of self-contamination or contamination of items in the environment.
<b>How does this affect my practice?</b>	Every staff member is encouraged to offer and request peer observation for donning and doffing of PPE. Review the tool and work with leaders in your area to support the use of this tool in your area.
<b>How do I find out more?</b>	See the front page of ePOPS for COVID-19 Resources and check regularly for updates and added resources. For access to all Policy & Procedure documents search <a href="#">ePOPS</a> .  Additional Donning and Doffing educational tools are available on <a href="#">ePOPS</a> under the Educational Materials accordion.
<b>Who do I contact for further information?</b>	Contact your unit leader or educator for additional information and support in the use of this tool.
