

Recipe-Based Formulas (Nephro)

A **Recipe-Based Formula** order is currently under development for Nephrology. In the meantime:

1. Search **PED Feeding** and select the appropriate orders for the main ingredient of your recipe (right-click, select **Modify**).

Search: Type:

This will populate all the relevant orders and you can select the appropriate diet/formula order for the patient.

2. If you do not see your main ingredient in the dropdown list of the expected category, select Other Formula and specify in Special Instructions (e.g. Suplena, Novasource Renal, etc.).
