

Anesthesia BCH Residents Quick Reference Guide

When starting your rotation in Pediatric Anesthesia

Ensure you have pediatric quick orders available and use pediatric Powerplans. Pediatric plans start with PED ANES.

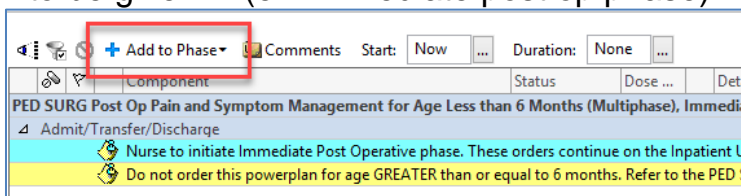

Documentation and Order Entry

For required documentation and order entry at BC Children's and Women's Hospital, please refer to this [CST Cerner Help \(healthcarebc.ca\)](http://healthcarebc.ca) page.

BCH							
Main OR							
Case	PAC	Nurse			Anesthesiologist		
		PowerForms	Periop Doc	iView (Bands)	Dynamic Doc	SA-Anesthesia	PowerPlan
Elective	Yes	• Surgical	• Intra-Op and Post-	Pre-Op Nurse	• Pre Anesthesia	Yes	Pre-Op

Order Entry

- If entering an ad hoc order, use “Add to Phase” in the phase you want the medication to be given in (ex. immediate post op phase)

- In OR: confirm if APS will follow. Surgery will enter floor phase pain orders unless patient will be followed by APS post op
- Order hygiene: if entering pain orders to continue on the unit (post op pain management orders), ensure to **discontinue** pre op pain powerplan
- Review “Plans” section of orders to ensure no powerplan duplication.
