

EDITS TO THE CST GENERATED GROUP & SCREEN REQUISITION

OVERVIEW

Planned change starting October 5th, 2022

- ▶ Edits to the Cerner generated Group & Screen requisition to reflect workflow changes.
- ▶ This requisition is still used when an order is placed in CST Cerner and the sample is collected WITHOUT using Sunquest.

KEY PRINCIPLES

1. Improve workflow
2. Remove redundancies
3. Response to feedback from staff at C&W

1

Please **DISCARD** this requisition if Sunquest Collect was used to collect the specimen.

2

This section (highlighted content) is deleted

~~Was Sunquest Clinical Collect used to collect and label specimens?~~

- ~~Yes: Collector initials: _____ Do not complete post collection section below.~~
- ~~No: Complete post collection section below:~~

3

Patient identification provided by:

- Patient
or
 Alternate (family member, guardian or **second health care provider not the collector**). Provide details:

Name of Alternate: _____
PRINT NAME

1. No requisition required when Sunquest Collect is used for sample collection.
2. Deletion of the section for collector details for Sunquest Collect; it is no longer necessary.
3. Clarify who meets the criteria as an “alternate identifier”; the collector cannot sign as the alternate identifier.
