

GROUP & SCREEN (& ABO ONLY) SAMPLE COLLECTION IN SUNQUEST COLLECT

OVERVIEW

- Planned change starting October 5th, 2022
- ▶ All steps for sample collection are **completed** in Sunquest Collect
 - ▶ Two **mandatory** Results at Request questions
 - ▶ The Cerner generated **requisition** is **no longer** required

KEY PRINCIPLES

- ▶ Improve workflow
- ▶ Remove redundancies
- ▶ Response to feedback from staff at C&W

Question 1

1. Did you follow site policy for positive patient identification ?

- Yes, I confirm that I followed site policy for positive patient identification.
 No, I understand the sample will be rejected.

Question 2

2. Patient identification provided by ?

- A. Patient (Self Identified)
 B. Alternate (family member, guardian, or second health care provider). Record alternate's full name.

- ▶ Staff do not need to complete & send the requisition to TML with the sample; it still prints, **please discard the requisition.**
- ▶ Results at Request **questions are mandatory**; you cannot proceed until the questions are answered.
 - ▶ Select **one response** per question.
 - ▶ The **sample** will be **rejected** if you **select "no"** for question one.
 - ▶ **Enter the full name** of the **alternate identifier** in Sunquest Collect if option B is selected for question two.
