<https://zoom.us/join> Meeting ID: 652 5721 0705 Password: 084973
 See the new Zoom Help Guide [here](#)

Topic	Practice
TOPICS INCLUDED IN PRACTICE UPDATE (3)	
Why use the dosing calculator?	Continuing to use the dose calculator ensures complete, accurate orders and provides the clearest dosing plans to pharmacy and nursing. No more cellphone calculators needed. Remember to review the final dose and round when appropriate, while dose calculator is open (ex. 31.13 mg should be rounded to the nearest mg or 5 mg as appropriate). Your nursing and pharmacy friends will thank you.
The CST Hub is Closed	For assistance using CST Cerner, continue to access CST Stabilization Support . For assistance with CST Access and Training , visit the C&W CST Cerner Learning Support team site. Division Heads, Program Directors and Administration support roles may complete the Access Referral Form (ARF) for Providers.
Transfusion Reactions	IMPORTANT: All transfusion reactions and suspected reactions must be reported to TML. This allows TML staff & the Hematopathologist to investigate reaction. Clinical staff must trigger the process by selecting one of the two PowerPlan options in Cerner; either a TR Notification or TR Investigation. CST Cerner Help: Transfusion Reaction guides you through the steps. The workflow looks different in Cerner but communication with TML remains the same (Transfusion Reaction Response: Algorithm C&W). If you have questions, the transfusion safety Nurse Clinician is available 08:30 to 16:00 most weekdays via Vocera "Transfusion Nurse".

Key Resources from Last Week

<p>Access just-in-time CST Support</p>		<p>For a limited time, many supports remain available to assist you in mastering using CST Cerner in your work.</p> <p>Details about CST Stabilization supports are available on CW Transformation Central including the new Zoom Help Guide here</p>
