Triaging Priority

Run 0 minutes ago

The list of patients awaiting triage will appear and you can click into their chart from the list.

After reviewing the chart you will decide if you want to place an **Accept Referral**, **Reject Referral**, or **Referral Information Request** (If more investigation/info is needed on the referring end).

Accept Referral - BCH Complex Care

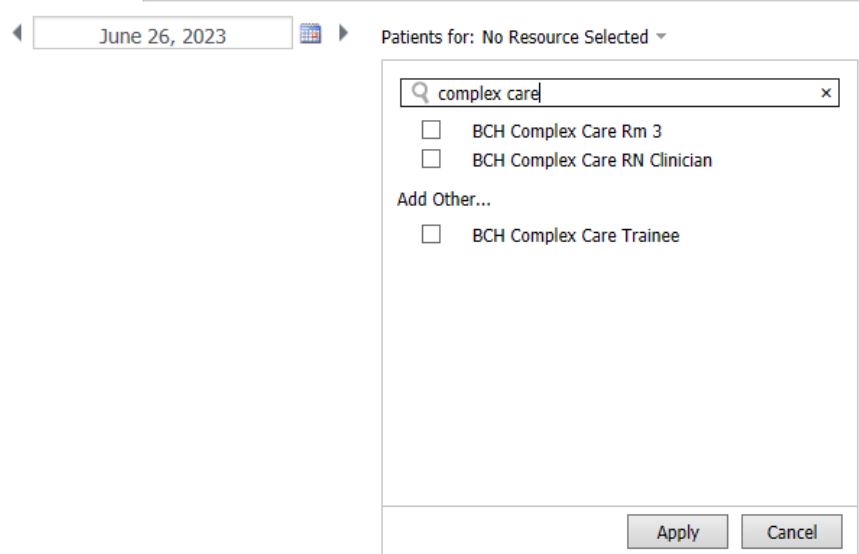

Page 1 of 1

Your order will appear in the shopping cart   and you will modify the details to include specific instructions to your clerk regarding how you would like them to follow up with the patient or referring provider.

AMBULATORY ORGANISER

TO LOCATE YOUR PATIENTS ON YOUR CLINIC DAYS, GO TO  Ambulatory Organizer

Search for **BCH Complex Care** (Providers can also search their own name) and check mark your name and/or Rm 3 box. You will be able to view all the patients for the day and you can move to other dates or months to see past/future appointments.

PATIENT LIST

Create a custom list where you can add your patients manually to keep track of on  Patient List

Click on  -> then -> select **Custom**-> **Next** ->

Enter a name for the list: (Limited to 50 characters)

BCH Complex Care - Custom list

Back Next Finish

You can name the list and hit finish. There are options above the naming section if you wish to add criteria but for outpatients, they will need to be added manually.

To **add a patient**, select the person icon and search by MRN/name, select the Hematology encounter so when you open the chart it will take you to that encounter.
