

Looking up person's MRN using HealthNet

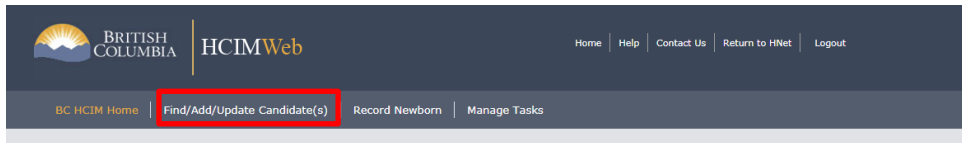

During a CIS/Cerner downtime (planned or unplanned), HealthNet may be used to lookup a person's MRN by following the below steps:

1. Go to the website: <https://hnwt1.moh.hnet.bc.ca/>

NOTE: Access to HeathNet requires a certificate to be installed on the workstation. This link will only work for staff who have been given access to HealthNet and have the certificate installed on their workstation that they normally use to access HealthNet.

2. Click on **Find/Add/Update Candidate(s)**

Welcome to the British Columbia HealthCare Client Identity Management Web Applications (BC HCIM)

What is BC HCIM?

The EMPI Administration Group, as part of Vital Statistics within the Ministry of Health, provides provincial identity management services in support of the delivery of health care services in British Columbia. Connected Health Authorities and other health care-related organizations provide and/or receive source-of-truth demographic details of patients from the provincial service in order to ensure accurate and current identity information related to the consumers of health care within the Province. The core of these identity management services is the province-wide Enterprise Master Patient Index (EMPI) which uses proven matching techniques to reconcile the multiple identity records for individuals encountering the health care system in BC. The BC HCIM web application is provided to authorized users as part of the EMPI Client Records Management services.

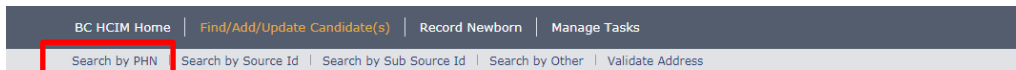

Privacy and Security

The need to ensure privacy cannot be understated; although no clinical data is involved, considerable attention has been, and will continue to be, paid to the need to protect confidentiality of the demographic information provided to and stored in the EMPI. Strict security controls and mechanisms have been implemented to enable this protection. Personal demographic information is being collected and used to provide care and services to those persons seeking access to publicly funded health care service in BC. The use and disclosure of this information by the EMPI is compliant with the Freedom of Information Protection of Privacy Act (FOIPPA). All individuals accessing EMPI services need to be continually aware of the importance of this aspect of connection.

Click to see what's new.

No bulletins to view at this time.

3. Click on **Search by PHN**. Enter patient's PHN and click **Search**

Search Criteria

Instructions

Search by PHN: Allows the user to find a specific client record by entering the client's PHN.

*PHN:

- If PHN is not found, click on **Search by Other**. Search by patient's Last name/Surname, First name & Date of Birth.

BC HCIM Home | Find/Add/Update Candidate(s) | Record Newborn | Manage Tasks

Search by PHN | Search by Source Id | Search by Sub Source Id | **Search by Other** | Validate Address

Search Criteria

Instructions

Use the following 2 factor search combinations:

- Surname, First Name and
- ONE of the following:
 - DOB
 - Address
 - Postal Code
 - Phone Number

Surname:

First Name:

Second Name:

Third Name:

Preferred Name:

Gender:

Date of Birth (yyyy-mon-dd):

Telephone:

Address:

- In **Search Results**, select the correct patient (double click on the patient's name).
