

OXYTOCIN PREPARATION FOR INDUCTION, AUGMENTATION, & CONTRACTION STRESS TEST STANDARDIZATION – MEDICATION

OVERVIEW

- ▶ When preparing oxytocin for labour induction, augmentation, and contraction stress tests, add 30 unit of oxytocin to 500 mL of Normal Saline

oxytocin titratable infusion (0.04 units/mL) in NS
oxytocin titratable infusion (0.06 units/mL) in NS standard

- ▶ We will no longer be using D5NS for intrapartum oxytocin

KEY PRINCIPLES

- Aligns with practice across CST Cerner sites.

Improve quality and consistency of care
