New Specialty Rotation? Set up the Correct Provider View

My Experience Button on Toolbar: customize provider view with specialty specific orders & notes	
 MyExperience	Set specific workflow for your specialty ex. “general surgery pediatric workflow”

New to BC Children's/ Pediatrics?

Pediatric/ BCCH Site Specific Reminders	
•	Use weight based dosing <ul style="list-style-type: none"> ○ Dosage calculator: use with caution & ensure units are correct (ex. kg vs mg/kg) ○ Enter dosing weight in powerform, found under measurements
•	Pediatric approved powerplans start with PED
•	Bloodwork orders : <ul style="list-style-type: none"> ○ For priority=routine/ AM draw: do not change time from default (0330), as it will cause the bloodwork to skip ahead to the following day. If after midnight and for the morning bloodwork round, select “routine” ○ Unit collect=yes: nurse/ IV team collects ○ Unit collect=no: lab collects bloodwork
