

POC Urinalysis Dipstick Orders Removed from BCW Hospital Units

BCWH (all inpatient units including the UCC, NICU, and surgical units)

*see full list of units affected on page 2

April 18, 2023

HIGHLIGHTS

- ▶ As of April 19, the following POC orders are unavailable within the BCW inpatient space
- ▶ This change aligns with Lab Accreditation Canada Standards

POC Order	What is changing?
POC Urinalysis Dipstick	Virtual view away from all BC Women's Hospital Inpatient areas
POC Urinalysis (synonym)	Virtual view away from all BC Women's Hospital Inpatient areas
POC Urine Dip (synonym)	Virtual view away from all BC Women's Hospital Inpatient areas
POC Urinalysis Dipstick Ketones and Proteins	Virtual view away from all BC Women's Hospital Inpatient areas

What's new... What's the same?

Urinalysis orders are still available for providers within Cerner. The urine will be sent to the lab for resulting, versus the nurse using a dipstick at the bedside. The following urinalysis orders are available:

Urinalysis Macroscopic (dipstick) Urine, Routine, Collection: T;N, once
 Urinalysis Macroscopic (dipstick) with Microscopic if indicated Urine, Routine, Collection: T;N, once

How does this affect my practice? What do I need to do next?

- **Providers:** continue to order urinalysis as needed, using the two orders above.
- **Nursing:** If a urinalysis order is placed by a provider, you will collect a urine sample and send to the lab [using Sunquest Clinical Collect](#)

What are some additional resources and supports?

- [CW Point of Care Testing Policy](#)

Who do I contact for further information?

- PCE and/or CRN
